

### Lock Your Car

The Dodge Brothers Six is equipped with a lock for the ignition. In addition to the ignition lock, cars with closed bodies are equipped with locks on all doors. The purpose of these locks is, obviously, to protect the owner of the car against theft.

### Lock Your Car

Theft insurance on an automobile does not prevent theft. It is financial assistance to the car owner after the car is stolen. It does not cover the full value of the car from financial and service standpoints. The monetary loss is misfortune in an investment and the value of the service loss cannot be estimated.

### Lock Your Car

Cars are generally stolen at a time when they are being used by the owner, either for business or pleasure. If stolen while being used for business, the loss of the car may mean the missing of very important business appointments.

### Lock Your Car

The locks are provided as protection against theft. Perhaps a professional thief will steal a car regardless of the theft protection precautions which may be taken by the car owner or the car manufacturer, but, nevertheless, the petty thief, at least, will be stopped if the car is locked whenever it is not in use. Cars are stolen from garages as well as when they are parked by the roadside. It may be the car owner's intention to leave a car for only a few minutes, but that is generally just enough time for the thief, who is watching his chance, to steal the car.

### Lock Your Car

The ignition switch on the Dodge Brothers Six is operated by a key so that when the ignition is shut off, for stopping the engine, it is a simple matter to lock the car by removal of the key. The door locks on closed cars are added protection and should also be used.

### Lock Your Car

Keys and locks are numbered and the lock numbers should be noted so that in case of loss or breakage new keys may be obtained. The lock number does not show on the outside of the lock.

### Lock Your Car

Dodge Brothers Six cars are provided with practical theft protection. This protection should be used.
